Document Management with Cross-Referencing

▶ Microsoft Technologies for integration and interoperability

ImageLink uses **Power App** within Business Central to **automatically** cross-reference documents. When a document is uploaded to one Business Central page the same document will be available in functionally related pages.

ImageLink securely stores metadata and documents in secure and scalable **Azure SQL Database** and **Azure Blob Storage**. We offer data migration services to retain your historical cross-referenced documents.

▶ Easy to use – launches from action menu on your screen

Business Central users click on the ImageLink Button in the action bar on Business Central page to open the ImageLink Power App. Easily attach the documents while ImageLink automatically cross-references the documents to related data in the system: Vendor cards automatically list attachments to Purchase Orders and Invoices. Customer cards instantly show attachments to Sales Orders and Sales Invoices. Every document becomes easy to find, easy to track, and impossible to lose.

▶ ImageLink™ grows as your company grows

ImageLink helps companies manage their data by going paperless. With ImageLink you can digitally transform your operations for increased productivity in any department: Accounts Payable, Accounts Receivable, Human Resources, Sales Order processing and more.

▶ Integration Points

In addition to the sample pages listed, more pages and add-ons are supported based on customer requirements.

Purchasing	Sales	
• Vendor Card • Purchase Quote • Purchase Order • Purchase Invoice • Purchase Credit Memo • Purchase Return Order • Posted Purchase Credit Memo • Posted Purchase Invoice • Posted Purchase Receipt • Vendor Ledger Entries	• Customer Card • Sales Quote • Sales Order • Sales Invoice • Sales Credit Memo • Sales Return Order • Posted Sales Credit Memo • Posted Sales Invoice • Posted Sales Shipment • Posted Return Receipt • Finance Charge Memo • Customer Ledger Entries	• Employee Card • Project Card/Job Card • Contact Card • General Ledger Entries • Historical Gen. Journal Lines • Historical Payables Documents • and many more...

Secure Document access

ImageLink allows Business Central users to be granted secure and controlled access to the attached documents. ImageLink offers an **extended** option for non-Business Central users to view the ImageLink documents related to Business Central pages.
